

CS55 Wireless Office Headset System

Superior digital sound meets office mobility

The Plantronics CS55 wireless headset system combines the clarity of traditional corded technology with the mobility of wireless, so employees can move around the office to wherever business takes them—without interrupting or missing a call. Continuing our tradition as a technology leader, Plantronics presents CS55 as the first headset in the United States to implement 1.9GHz voice-dedicated wireless technology. The convenient CS55 delivers:

- The freedom of mobility. Mobile multi-tasking—conferring with colleagues, walking to the printer, pouring a cup of coffee—need not interrupt important calls up to 300 feet from a desk phone.
- Superior quality, secure communications. Voice-dedicated 1.9GHz DECT technology provides uncompromised audio quality and the lowest probability of interference.
- All-day availability. The CS55 gives workers 10 hours of unencumbered talk time and the option of remote answering,* so they never miss calls when away from the workstation.
- Crystal-clear conversation. An extended boom and noisecanceling microphone filter out background noise, so listeners hear conversations clearly.
- Customizable comfort. Both stylish and comfortable, the CS55
 can be converted to over-the-ear, over-the-head or behind-the-head styles.

*with optional HL10 Handset Lifter
